Experience

Toyama Controls & Systems Pvt Ltd

Front End Developer

July 2023 - Present

Bengaluru, Karnataka

- Led the development and maintenance of front-end solutions using various technologies, with a primary focus on the Flutter framework for creating custom widgets and optimizing user interfaces.
- Collaborated closely with cross-functional teams to implement responsive designs and ensure seamless integration with backend services, resulting in improved user experiences.

Sharpener Tech

Front-End Developer

December 2022 - May 2023

Online

- Successfully completed Front-End Development training at Sharpener, mastering React by proficiently utilizing HTML, CSS, JavaScript, React.js, Redux, Routing, and various hooks.

Projects

Blog Application | Source Code: <https://github.com/juhi-coder/blog-application-fullstack.git>

- Engineered a Blog Application with Flutter front-end and Node.js/Express.js back-end, leveraging MongoDB for data storage.
- Implemented robust Signup and Email Password Authentication functionalities.
- Developed features for creating, retrieving, and interacting with blogs, including liking and commenting on posts.

Instagram-Clone | Source Code: https://github.com/juhi-coder/instagram_clone/

- Crafted an Instagram-Clone with Flutter front-end, utilizing Firebase Auth and Storage for the back-end and database.
- Implemented secure Email Password Authentication for user authentication.
- Engineered features for sharing, displaying, liking, and commenting on posts, alongside search, follow, and user profile functionalities.
